 - Small group discussion questions:
 - Are there aspects of the housing continuum that are important for people with severe mental illness that we need to explore in more detail (or that we failed to address)?
 - How do the housing and service models presented align with your vision for a system that serves people with severe mental illness? Which of these services or delivery models are needed in your community?
 - What barriers exist for the communities you serve/or represent in accessing or resourcing these programs? Be as specific as possible.
 - What actions, policy changes, and/or investments would alleviate barriers to and support housing and housing-related services and programs?
- **Report out and discussion**
 - *What were the top three highlights from your discussion?*
